

“Ray McDougal suggested, designed, and installed a lift in our garage, which is the perfect answer to my husband’s problem of access to our home. The work was extremely well done, with much thought given to the convenience of our family.”

“Ray also needed to redesign and build a new set of stairs and a landing. We really appreciate his fine work on our behalf.”

“We thank him for the suggestion – we had not even considered a lift before he suggested one.”
